

SweDermis®

Swedish Excellence in Every Drop

Advanced Hyaluronic Acid Fillers

Crafted for Precision. Designed for Natural Beauty.

A Trusted Standard in Modern Aesthetic Medicine

BRAND PHILOSOPHY

A Refined Vision of Beauty

SweDermis® is a premium Swedish range of hyaluronic acid fillers, developed to meet the high standards of modern aesthetic medicine.

Our philosophy is simple: enhance natural beauty without compromising individuality. Every formulation is designed to respect facial harmony, preserve expression, and deliver subtle, elegant results.

SWEDISH SCIENCE & HERITAGE

Developed in Sweden. Defined by Precision.

SweDermis® is developed under one of the most rigorous regulatory environments in the world.

Sweden is known for its strict standards in medical product approval, reflecting a strong commitment to safety, quality, and performance in safety, quality, and performance.

This commitment results in:

- **High purity for optimal biocompatibility**
- **Balanced elasticity for precise shaping**
- **Strong cohesiveness for structural support**
- **Smooth gel consistency for controlled injection**

A level of trust built on science— not claims.

ADVANCED HA TECHNOLOGY

Purity. Structure. Performance.

SweDermis[®] fillers are based on highly purified, non-animal hyaluronic acid with a homogeneous, monophasic structure.

The advanced formulation provides:

- High purity for optimal biocompatibility
- Balanced elasticity for precise shaping
- Strong cohesiveness for structural support
- Smooth gel consistency for controlled injection

The result is a refined filler that integrates seamlessly into tissue and performs predictably in every treatment.

NATURAL DYNAMICS

Designed to Move Naturally

A key advantage of SweDermis[®] is its ability to adapt to natural facial movement.

The gel structure allows the filler to move harmoniously with facial expressions maintaining softness, flexibility, and a natural appearance both at rest and in motion.

No stiffness. No artificial look.
Only natural, expressive results.

CLINICAL PERFORMANCE

Precision You Can Trust

SweDermis[®] is engineered to support clinicians with maximum control and confidence:

- Smooth and controlled injection flow
- Even distribution within the tissue
- Low risk of irregularities or lump formation
- Soft tissue integration with natural transitions
- Predictable and gradual resorption

Delivering results that are consistent, reproducible, and clinically reliable.

SAFETY & REVERSIBILITY

High Safety. Full Control. Peace of Mind.

Thanks to its high purity and optimized structure, SweDermis[®] offers excellent tolerability and safety.

An important clinical advantage:

- Can be reversed with hyaluronidase when clinically indicated
- Supports controlled correction when needed

This provides practitioners with an additional level of control and confidence in every procedure.

Combined with Swedish regulatory standards, SweDermis[®] represents is designed to support a strong safety profile in clinical use in its category.
